

## **LG-N systems launch iPECS Phase 4**

SAN FRANCISCO – August 21 2007 – iPECS Phase 4, IP Telephony Solution for SME's, was launched at LG-Nortel systems channel partner sales conference held in San Francisco USA.

The sales conference attended by leading Australian channel partners and senior executives from LG-Nortel systems, LG-Nortel Korea and Telstra, announced the Australian availability of Phase 4 iPECS and it's inclusion in the Telstra Business Systems program. iPECS Phase 4 includes the following:

**Unified Communication Solution (UCS)** that delivers VoIP, video, instant messaging, conferencing and presence within the telephony solution

**Unified Messaging Solution (UMS)** that combines advanced Automated Attendant and Voice Mail functions with UMS and desktop call control to enhance voice mail solutions

**Local system and network redundancy** that allows a back-up Call Server to be configured for critical sites, or at network sites should the central Call Server fail

**Conferencing Module** which delivers high quality voice conferences for up to 24 parties, or video conferencing for up to six parties using iPECS UCS

**Powerful Mobility Solutions** offered by iPECS addresses customers mobility needs. iPECS offers the choice WiFi, IP-DECT, Softphone and PDA solutions for mobile employees

"iPECS is built on a rock solid Voice and IP platform which is ever evolving. It is designed to embrace current trends and future evolution, and has mass-market appeal particularly with SME's. Customers who have current LG-Nortel Aria systems also have an easy and familiar upgrade path available to them," Chris Karagiannis- Marketing Manager LG-Nortel systems said.

*LG-Nortel systems are the exclusive distributor in Australia and the Pacific of LG-Nortel communication products and solutions. LG-Nortel Korea is a global leader in communication solutions with revenues in excess of 1 billion dollars.*
